MAKING MONSTERS

QUICK PLAY GUIDE

Build ridiculous Monsters, score Prestige, and win the Mad Science Fair.

GOAL

Score the most Prestige to win.

FAST SETUP

Place each Monster Part type in separate graves on the center board. Put Upgrade tiles in their spaces.

Set up your **Stockroom bag** using the counts on your player aid. Draw 1 Monster card to your lab board, then draw 5 Monster Parts into your lab.

Each player takes their 3 Order Tokens.

HOW A ROUND WORKS

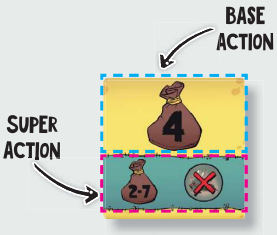

1. CHOOSE AN ORDER TOKEN

Each player chooses 1 Order Token and places it face down. Reveal at the same time.

2. CHECK FOR SUPER ACTION

Each Order Token has:

Base Action = top
Super Action = bottom

If your bottom color matches the top color of either neighbor's token, use the Super Action.

If it does not match, use the Base Action.

***Example:** If your bottom color is blue and either neighbor has blue on top, you get the Super Action.*

3. RESOLVE YOUR TOKEN LEFT TO RIGHT

Follow your Order Token from left to right.

If an action says to draw first and place later, draw first.

4. PLACE MONSTER PARTS

Place Monster Parts on:

- **Your Monster**, if the part matches
- **Your Sorting Table**, if there is room
- **An Upgrade**, if allowed
- **Your Rejects Track**, if the part does not fit

Rot always goes on your Rejects Track.

5. REANIMATE OR KEEP BUILDING

After placing parts, decide:

Reanimate if you want to score completed Monsters.

When you Reanimate:

- Score completed Monsters
- Take rewards shown on your player aid
- Set scored Monsters aside for the Mad Science Fair
- Return everything else in your lab to your bag, including Rot and unfinished Monsters

Keep Building if you want to leave everything where it is for next round.

6. REFRESH

Refill Upgrade spaces and rotate the center board. Draw 2 Monster cards, keep 1, and discard the other. Start the next round.

Quick Reminder

CHOOSE ORDER → MATCH COLOR →
RESOLVE LEFT TO RIGHT → DRAW/PLACE PARTS →
REANIMATE OR KEEP BUILDING → REFRESH

First Game Tip

Follow the steps in order. The game clicks quickly once players understand **Super Actions** and **Reanimation**.

MAKING MONSTERS

KEY RULES + FAQ

BASE VS. SUPER ACTION

Base Action = top

Super Action = bottom

You only use the **Super Action** if your **bottom color** matches a neighbor's **top color**.

Do not use the bottom action automatically.

DRAWING MONSTER PARTS

NORMAL DRAW

Draw all parts first, then place them.

If you bust, place everything first, then bust.

ONE-AT-A-TIME DRAW

Some actions let you draw parts one at a time.

DRAW 1 → PLACE IT → DECIDE WHETHER TO CONTINUE.

You may stop early.

If you bust, stop immediately.

BUSTING

You bust when your Rejects Track is full.

- **Normal draw:** place everything, then bust.
- **One-at-a-time draw**: bust immediately and stop.

REANIMATION

When you **Reanimate**:

- Score completed Monsters
- Take your rewards
- Set scored Monsters aside for the Mad Science Fair
- Return everything else in your lab to your bag

Everything goes back, including Rot and unfinished Monsters.

UPGRADE TIMING

Upgrades gained during Reanimation do not work right away.

They start working next round.

REPLICATORS

Replicators trigger once per Reanimation phase, not once per Monster.

MEAT / LIMB

Meat and Limb mean the same thing.

CENTER BOARD GRAVES

Exact grave positions do not matter.

Keep each Monster Part type grouped together.

MAD SCIENCE FAIR

When the final Rot token is taken:

- Finish the round
- Then play the Mad Science Fair

During the Mad Science Fair:

- Choose up to 5 completed Monsters
- Return all lab contents to your bag
- Draw parts one at a time
- Stop whenever you want
- Score those Monsters

If you bust, stop immediately. You score no bonus points from the Mad Science Fair.

Most Prestige wins.

MOST COMMON MISTAKES

- Do not use the bottom action automatically.
- Always resolve Order Tokens left to right.
- New Upgrades do not work until the next round.
- After Reanimation, everything else in your lab goes back into your bag.
- Normal draw and one-at-a-time draw are different.
