COASTAL EXPANSION

RULEBOOK

KEYSTONE
NORTH AMERICA
COASTAL EXPANSION

The *Keystone: North America Coastal Expansion* features 28 new species, 10 additional Skill tokens, and two new variants that enhance the base game. It also introduces a new field journal with 10 solo challenges and an engaging narrative adventure, allowing players to step into the role of a coastal biologist assisting in filming a nature documentary!

COMPONENTS

1 Rulebook

1 Field Journal

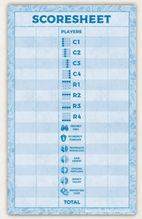
Community Focus Board

10 Skill Tokens

Community Focus Token

28 Species Cards

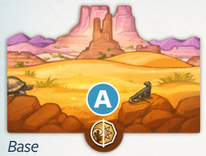
2 Player Aids



1 Score Pad

30 Conservation Center Tokens
(5 types consisting of 2 Base Conservation Centers & 4 Conservation Expansions)

CONSERVATION CENTER TOKENS



Base

Front

Back

Base Conservation Center
This token can hold 1 species card. The icon (A) indicates which Species cards can be placed into it.

Conservation Center Expansion These tokens increase the Conservation Center's card capacity by 2, indicated by the 2 pips (B) on the bottom tab. These tokens can be stacked in any order. The back shows which (C) Conservation Center the token belongs to.

SETUP

In *Keystone: North America Coastal Expansion*, you can play with any or all of the following new components introduced in this expansion pack. Follow the standard game setup rules within the *Keystone: North America* rulebook and then add any or all of these components by following the relevant steps. You may play with 1 or both variants.

New Species:
Add the 28 Coastal expansion species cards to those used in the base game. (These cards have a expansion icon on the bottom right.)

Active Side (*Water*)

Exhausted Side (*Stone*)

New Skill Tokens:
Add the 10 new Skill tokens to those from the base game, or just use the new ones. Then randomly choose 5 Skill tokens and place them on the table, active side up. Place the rest of the Skill tokens back in the box. (If this is your first time playing with the new set, we recommend using only new Skill tokens so you can experience them.) Skill token effects are described on pages 8 & 9 of this rulebook.

Note: Some Skill tokens require specific variants for their core functionality. If you are not playing with the Community Focus Board, remove Skill token **15** from the game. If you are not playing with Conservation Centers, remove Skill tokens **11**, **14**, **17**, & **18** from the game.

Community Focus Board Variant:
When playing with the Community Focus Board Variant, place the Community Focus Board nearby. Either have the first player choose a habitat to place the Community Focus token on or choose a habitat at random to place it on.

Conservation Centers Variant:
When playing with the Conservation Centers variant, give each player 1 Base Conservation Center token of each Conservation Center type (5 in total). Place the Conservation Center Expansion tokens within reach of all players, sorted by type (matching symbol on back), to create a supply of Conservation Expansion tokens.

Player Aid:
Give each player a Player Turn aid. (If you are playing with any of the expansion rules, we suggest handing out this aid.)

NEW ACTIONS

In addition to buying a Wild Card, this expansion adds 3 new special actions to the game. These special actions are specific to playing with the Conservation Centers and the Community Focus Board variants. You may perform each of these special actions once per turn (on your turn). They are listed below and on the Player Aid.

Conservation Center variant:

- Advance a Conservation Center

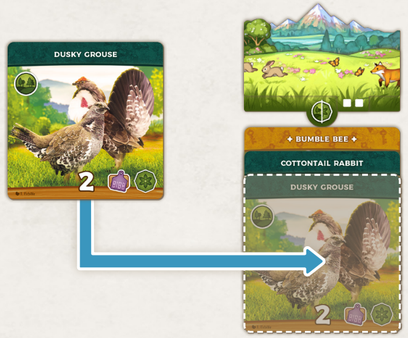
Community Focus variant:

- Research the Community Focus
- Change the Community Focus

PLAYING WITH CONSERVATION CENTERS

This variant allows you to place Species cards into Conservation Centers instead of your player board. This gives you further player board flexibility and additional points from your Conservation Centers.

Any time you would place a card on your player board, including when you move it, you may instead place it in one of your Conservation Centers. In addition, skills that affect a card on your player board (e.g. moves or places Research) can instead affect a card in one of your Conservation Centers. To place a species in a Conservation Center, the species must match either the habitat, season, or symbol represented on the Conservation Center token. Each player starts with 1 base Conservation Center of each type in their play area. Each base Conservation Center has the capacity to hold 1 species. However, players can spend synergy tokens to advance their Conservation Centers and increase their capacity. Once a player has reached a Conservation Center's capacity, they can no longer place species in that Conservation Center.



Example: Lily takes the **Introduce Action** and chooses the Dusky Grouse. She places it in her Temperate Woodland Conservation Center. Lily has advanced her Conservation Center once, giving it a capacity of 3 species. Because the Dusky Grouse is the 3rd species placed in this Conservation Center, Lily will no longer be able to place species in it until it is advanced further to increase its capacity.

CONSERVATION CENTER TYPES

Advance your base Conservation Centers by purchasing Conservation Expansions that grow the scene and increase that center's capacity. These are the 5 Conservation Center types:

* You can find the name of the Conservation Center type on the back of the Base token for scoring reference.

Base Conservation Center

A Temperate Woodland Conservation Center

This Conservation Center can hold species cards with the Forest/Woodland icon or the Spring Icon.

An Arid Desert Conservation Center

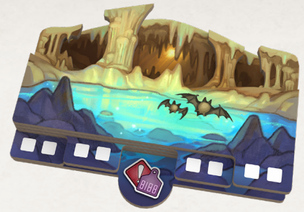
This Conservation Center can hold species cards with the Desert/Grassland icon or the Summer Icon.

A Cooling Wetland Conservation Center

This Conservation Center can hold species cards with the Wetland/River icon or the Fall Icon.

A Snowy Valley Conservation Center

This Conservation Center can hold species cards with the Arctic/Alpine icon or the Winter Icon.



A Protected Cave Conservation Center

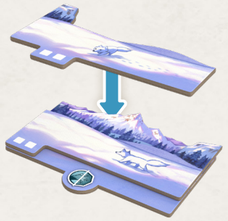
This Conservation Center can hold species cards with the Endangered icon or the Tag Icon.

ADVANCE A CONSERVATION CENTER

Conservation Centers can be advanced to increase their capacity by placing Conservation Expansion tokens that match their type on top of them. Any Conservation Expansion tokens that are added on top of a base token will increase that Conservation Center's capacity by 2 (indicated by the two square pips on the bottom of that token).

You can advance a Conservation Center by using your special action and spending synergy tokens. The cost to advance a Conservation Center is dependent on how many times you have advanced that center.

- If it is your **1st** time advancing a Conservation Center, it will cost you 3 Synergy tokens.
- If it is your **2nd** time advancing a Conservation Center, it will cost you 5 Synergy tokens.
- If it is your **3rd** time advancing a Conservation Center, it will cost you 7 Synergy tokens.
- If it is your **4th** time advancing a Conservation Center, it will cost you 10 Synergy tokens.



Example: Miguel wants to advance his Snowy Valley Conservation Center, which has already been advanced once. To do so, he takes the special action **Advance a Conservation Center**, pays 5 Synergy tokens, and places a Snowy Valley Conservation Expansion token on top of his center. This brings his Snowy Valley Conservation Center to a capacity of 5, allowing him to store more species than before.

Note: A Conservation Center can only be advanced if there are available Conservation Expansion tokens that match their type. If there are no more Conservation Expansion tokens that match in the supply, Conservation Centers of that type can no longer be advanced.

THE COMMUNITY FOCUS BOARD

This variant allows you to have more control when placing Research tokens, expanding your research strategies and giving you the potential to create higher scores.

The Community Focus board gives players a new way to place Research tokens on species. The Community Focus token will start on one of the 4 habitat symbols listed on the Community Focus board (Forest/Woodland, Desert/Grassland, Wetland/River, or Arctic/Alpine). This token represents the types of species the community is interested in, and you can use the **Research the Community Focus** special action to research matching species.

RESEARCH THE COMMUNITY FOCUS

To research a species that has a habitat symbol matching the current Community Focus, take the special action **Research the Community Focus** and pay 5 Synergy tokens. Then place a Research token on an unresearched species (a species with no research tokens on it) you own that has a matching habitat. This species can be on your board or in one of your Conservation Centers.

CHANGE THE COMMUNITY FOCUS

Throughout the game you may want to change the community focus to research a specific species. You can do this by taking the **Change the Community Focus** special action. Pay 3 Synergy tokens to move the Community Focus token on the Community Focus Board to a habitat symbol of your choice.

SCORING

7. SCORING CONSERVATION CENTERS

Add up the number of species you have in a Conservation Center and the number of Research tokens on them and multiply that sum by the number of Conservation Center tokens you have of that type. Do this with each Conservation Center in your play area.

Example: David has advanced his Temperate Woodland Conservation Center 3 times throughout the game, and was able to place 7 species cards in it, 3 of which have Research tokens on them. This means that David has 4 Temperate Woodland Conservation Center tokens in total (his base token, and the 3 tokens that he added to it when advancing). To calculate his score, he adds together the 7 species cards and the 3 Research tokens to a total number of 10, and then multiplies that by the 4 Temperate Woodland Conservation Center tokens, giving him a total of 40 points from that Conservation Center.

Note: Keystone symbols do not have any effect when a species card is in a Conservation Center. They only allow you to score again on your player board.

COASTAL EXPANSION FIELD JOURNAL

Field Journal

The Coastal Expansion Field Journal offers unique challenges paired with a story that lets a player take on the role of a coastal biologist working with a nature documentary crew. For the best experience with the Field Journal's 10 new challenges, we suggest they be played in order. However, you do not need to have played or completed Keystone: North America's original Field Journal to enjoy this one.

Set up solo/co-op mode as detailed in Keystone: North America's base game rulebook while adding in the setup included in this expansion's rulebook when needed. Many of the scenarios in this journal will utilize the expansion components and variants so make sure that they are included when necessary.

If a Field Journal assignment's special rules ever contradict the normal rules, the special rules in the Field Journal take precedence.

Field Journal Assignment example

SKILL TOKEN DESCRIPTIONS

Note: Unresearched cards are those without any Research tokens on them.

Active:
You may draw the top 3 cards of the Species deck. If you do, you may place 1 on an empty space on your player board or in an available conservation center you control. Discard any unplaced cards in any order to the discard pile. Then gain 2 Synergy tokens.

#11

Exhausted:
You may place the top card of the discard pile on an empty space on your player board or in an available Conservation Center you control.

Active:
You may exchange 1 card on your player board or conservation center with a card that is in the field. If the card in the field had Synergy tokens on it, keep them in the field on the new (exchanged) card. Then place 1 Synergy token from the supply on each card in the field.

#12

Exhausted:
Gain 3 Synergy tokens.

Active:
You may move a card on your player board or Conservation Center to an empty space or different Conservation Center you control. Then discard 1 card from the field and gain all Synergy tokens on that card.

#13

Exhausted:
Discard 1 card from the field and gain all Synergy tokens on that card.

Active:
You may pay 5 Synergy tokens to gain and place a Conservation Expansion token of your choice. Then place 1 Synergy token from the supply on each card in the field.

#14

Exhausted:
You may move 1 card on your player board or Conservation Center to an empty space or different Conservation Center you control.
OR
Gain 2 Synergy tokens.

Active:
You may place 1 Research token on an unresearched card with a habitat that matches the Community Focus. Then place 1 Synergy token from the supply on each card in the field.

#15

Exhausted:
You may change the Community Focus to a habitat of your choice. Then gain 2 Synergy tokens.

Reminder: The panel at the bottom of the Skill tokens is a preview of the token effects on the opposite side of that token. The token effects in this panel are not to be resolved.

Active:
You may pay 5 Synergy tokens to gain and place a Wild Card of your choice. Then discard 1 card from the field and gain all Synergy tokens on that card.

#16

Exhausted:
You may move 1 card on your player board or Conservation Center to an empty space or different Conservation Center you control.
OR
Gain 2 Synergy tokens.

Active:
You may place 1 Research token on an unresearched card in a Conservation Center you control. Then discard 1 card from the field and gain all Synergy tokens on that card.

#17

Exhausted:
You may draw the top card of the Species deck. If you do, you may place it into a Conservation Center you control.
If you do not place it, discard it.

Active:
You may draw the top 2 cards of the Species deck. If you do, you may place one or both of them into Conservation Centers you control. Discard any unplaced cards in any order to the discard pile. Then place 1 Synergy token from the supply on each card in the field.

#18

Exhausted:
Gain 3 Synergy tokens.

Active:
You may place 2 Research tokens on an unresearched card with the Tag icon on your player board or in a Conservation Center you control. Then place 1 Synergy token from the supply on each card in the field.

#19

Exhausted:
You may place 1 Research token on an unresearched Wild card on your player board or in a Conservation Center you control.

Active:
You may place 1 Research token on an unresearched card with the Endangered Species icon on your player board or in a Conservation Center you control. Then discard 1 card from the field and gain all Synergy tokens on that card.

#20

Exhausted:
You may move 1 card on your player board or Conservation Center to an empty space or different Conservation Center you control.
OR
Gain 2 Synergy tokens.

COASTAL SPECIES CARD DATABASE

#	PIC	SPECIES NAME
1		Arctic Woolly Bear Moth
1		Black Rail
1		Gray Bat
1		Green Salamander
1		Least Tern
1		Sea Oats
2		American Pika
2		Atlantic Puffin
2		Mexican Fishing Bat
2		Mountain Beaver
2		Ochre Sea Star
2		Western Spotted Skunk
3		American Mink
3		California Kingsnake

#	PIC	SPECIES NAME
3		Channel Island Fox
3		Eastern Indigo Snake
3		Kemp's Ridley Sea Turtle
3		White Sturgeon
4		American Badger
4		Crested Caracara
4		Osprey
4		Ribbon Seal
4		Sea Otter
5		Atlantic White-Sided Dolphin
5		Killer Whale
5		Northern Elephant Seal
5		Pacific Walrus
5		Steller Sea Lion

OTHER GAMES FROM ROSE GAUNTLET

WILD GARDENS

FORAGE FOOD AND FIND FRIENDS IN THE LATEST STRATEGY GAME FROM ROSE GAUNTLET ENTERTAINMENT

In Wild Gardens, 1-4 players take on the role of a forager, visiting beautiful real-life locations across North America to gather flavorful ingredients, cook delicious recipes, and serve eclectic guests. Designed by Isaac Vega, the award-winning designer of Dead of Winter, Forgotten Waters, and Ashes Reborn, experience not just a relaxing adventure, but a deeply strategic one as you carefully plan movements, upgrade abilities, and activate skills to earn the most victory points and be crowned top forager!

TURNIP

WELCOME TO THE WORLD OF TURNIP!

It's time to get your farm in check and prepare for the annual Turnip-Off! In this new bluffing game from Rose Gauntlet Entertainment, 3-5 players will compete as turnip farmers trying to take the most turnips to market. Will you stay pure and plant turnips the right way, or will you lie your way to sweet turnip victory? Stash cards, catch fibbing players, gather turnip tokens, and play the highest total of cards to slide into victory each round. It's your sacred duty to win, and don't forget to pay the Turtle Tax!
